November 19, 2002

Dear Mr. Griffin,

We've been using 2 DiscoverStations in one of our main computer labs in the Information and Communication Technology Building at the University of Calgary since August 21st 2002. This lab is heavily used by our 2nd, 3rd, and 4th year, Electrical, Computer, and Software engineering students. As we hoped our students have not noticed that the "DiscoverStation Seats" are any different than our standard workstations. The success of this initial test period, means that we will soon move to replace all 24 computers in this lab with Discovery Station seats. This will be a significant cost saving to us.

I would also like to commend Useful on their prompt service, in customizing the stations for our rather unique situation. The technical competence of the Useful team is really quite impressive.

Sincerely,

L. Joshua Leon Ph.D.
